

The bag has been designed to allow you to wash the items you would not normally put inside your machine for fear of hair, mud and grit clogging up the filter. It has the added benefit of cushioning small buckles and clips thus protecting the drum from additional wear and tear. You can simply take your bag wherever you go and fill it up with numnahs, summer sheets, headcollars and lead ropes ready to bring home. The handy handles and tabs assist with the opening and allow you to hang them up in various places, whilst the strong Velcro fastenings keep hair and debris sealed inside. The bags can also be used for storage, keeping items safe and clean. Our

Above, Chris Orchard from the Orchard Scurry Team who is sponsored by Carriagehouse Insurance & Real Time Imaging regularly uses the laundry bags.

testers have reported that inserting liquid tabs, tablets or laundry balls inside the bag gives an even better result. The bag does not like heat, tumble dryers or bleach, so after your wash just hang it up to dry and in no time it will be ready to use again. When cleaning brushing boots etc., it is recommended that you rinse your boots under a cold tap to remove all grit and sand before placing inside the bag. A set comprises of one small and one large bag and costs £24.99. The small bag measures 18" x 18" and the large 28" x 36". **For further information call KRS Products Ltd on 020 8953 2494 www.krsproducts.co.uk**
